

CITY OF ORANGE
CDBG-DR APPLICATION PROJECT SUMMARY
LIFT STATION IMPROVEMENTS

Project Description:

During Tropical Storm Imelda, the City of Orange received between 15 and 18 inches of rainfall. Widespread flooding led to massive I & I of the wastewater collection system, as well as backup and overflow of raw sewage throughout the City. This influx of groundwater resulted in disruptions to service, an inability to flush toilets, environmental hazards and other threats to public health and safety.

The proposed improvements will reduce a risk to public health and safety of residents in the western portion of the City of Orange.

Construction will consist of the improvements to the Roselawn Lift Station. Critical components will be elevated to repair and harden the facility.

The Proposed Budget is as follows:

	TxCDBG Funds	Local Funds	Total Funds
Administration	\$100,000.00	\$0.00	\$100,000.00
Engineering	\$117,000.00	\$0.00	\$117,000.00
<u>Construction</u>	<u>\$783,000.00</u>	<u>\$10,000.00</u>	<u>\$793,000.00</u>
Total	\$1,000,000.00	\$10,000.00	\$1,010,000.00
